

Nova LifeInvest Select - General Conditions

Investment-linked life rules - synthetic demo document

1. Purpose

Nova LifeInvest Select is a synthetic unit-linked life insurance product used only for the PolicyLens demonstration corpus.

2. Valuation

The value of the contract depends on the number of units allocated to selected funds and the applicable unit prices. Investment performance is not guaranteed unless a specific guarantee is stated in the Particular Conditions.

3. Fund charges

Underlying funds may apply annual management charges. The exact rate depends on the selected fund and is stated in the Fund Annex using the fund name and ISIN identifier.

The phrase "management charge" in this section explains the concept only. It does not state the charge for any individual ISIN.

4. Investment risk

Fund values may rise or fall. A risk indicator in the Fund Annex is descriptive and does not guarantee future volatility.

5. Switches

The number of included fund switches is set out in the Particular Conditions.

6. Fund identification

The Fund Annex identifies each investment fund by its fund name and ISIN. Where a transaction instruction specifies an ISIN, that identifier governs if a fund name is abbreviated or ambiguous.

Synthetic document created solely for the PolicyLens RAG prototype. It does not describe a real person, policy, product or insurer.
