

Nova LifeInvest Select - Fund Annex

Synthetic fund register with exact ISIN identifiers

1. How to read this annex

Each row represents one synthetic investment fund. The ISIN column is the stable exact identifier for the row. Management charge values are annual percentages and are separate from the contract administration charge.

For questions containing an exact ISIN, the identifier should be treated as a deterministic lookup key before any semantic ranking.

2. Fund register - Part A

Fund	ISIN	CCY	Risk	Mgmt fee	Focus
Nova Global Equity	LU1234567896	EUR	5/7	1.20%	Global equities
Nova Green Bonds	LU0987654323	EUR	3/7	0.70%	Investment-grade green bonds

Nova Quality Income	LU2424242423	EUR	4/7	0.90%	Income equities
Nova Biodiversity	LU2525252529	EUR	6/7	1.55%	Biodiversity equities

4. Notes on charges

The management charge shown in the table is the value to cite for an ISIN-specific question. Similar fund names or descriptions must not be used to substitute for an exact ISIN match.

Example: Nova Global Equity (LU1234567896) has an annual management charge of 1.20%. Nova Global Infrastructure has a different fee even though both descriptions contain the word "Global".

Synthetic document created solely for the PolicyLens RAG prototype. It does not describe a real person, policy, product or insurer.
